## Antibody Testing for First Responders

Hackensack Meridian Health is offering antibody testing to our valued First Responders including, Police, Fire and EMS.

The test is being offered at selected HMH Medical Group offices and Hospitals to any first responder who has not previously been tested. You do not have to be an existing patient or have insurance to participate in this program.

To schedule your antibody test, please call the number below in the region you would like to be tested.

You will be asked to establish an HMH My Chart. My Chart is our electronic medical record, and this is where you will access your test results. You will need to provide a valid email address at the time of scheduling your appointment and will be asked to activate your MyChart before your scheduled test. You will also be asked to provide insurance information if available.

In **Middlesex County**, please call **732-661-2020** to schedule at this convenient location:
