

**EMS Council of NJ
Annual Symposium and Trade Show
Pre-Convention
Thursday, October 17
1pm - 4pm**

Airway Interventions and Cardiology Lab

Presented by

Kelly Grayson, NRP, CCP, EMS-I

Nancy Magee, AEMT, NREMT, EMS-I

“Wow, the heart isn’t anything like I thought it was. I just envisioned this bag of blood...” We hear variations on that statement at every pluck lab we conduct. There is only so much you can learn from a medical illustration or an anatomical model, and the kinesthetic learners so common in EMS assimilate and understand information much better when they can put their hands on the subject material. Join Kelly Grayson and Nancy Magee for this hands-on look at how our organs work, and how dysfunction in those organs manifest themselves in the patient’s clinical presentation. Prepare to get your gloves bloody and your mind stimulated!
